

BIOL 3121 : Genetics and Molecular Biology Laboratory

Laboratory course introducing methods of genetic crosses, DNA extraction, restriction digests, PCR, transformation and cloning and current molecular techniques. Prerequisites: [BIOL 1351](#)/1151, 1352/1152, [CHEM 1342](#). Corequisite: [BIOL 3321](#)

Credits 1

Course ID

007388

Requisites

Prerequisites (with a grade of 'C' or better): [BIOL 1351](#)/1151, 1352/1152 and [CHEM 1341](#)/1141, 1342/1142;

Corequisite: [BIOL 3321](#)

Semester Offered

Fall semester
