

JPII 5300 : Redemptor Hominis and the witness of John Paul II

A study of the life and thought of John Paul II through a consideration of his autobiographical writings and very brief selections from his works; the convergence of his artistic, philosophical, theological, spiritual and pastoral gifts will lead to a focus upon his first encyclical, Redemptor Hominis ("The Redeemer of Man"), as hermeneutical key to his project and works.
