

# NURS 7014V : Clinical Applications Practicum

This course provides students with planned clinical practicum experiences designed to demonstrate skills and knowledge learned in the classroom through self-designed clinical experiences in collaboration with selected clinical partners and their clinical practice coaches. Students will focus their clinical experiences on the roles and competencies of transformational nurse leaders creating healing environments for a self-selected patient population. The clinical practicum provides students with an opportunity to integrate the diverse dimensions of their DNP learning experiences in a “real world” situation and capture for themselves the meaning of these experiences through self-reflective journaling and maintenance of a clinical log. Students will work collaboratively with their clinical partners to ensure all practicum experiences concurrently benefit the student and the clinical partner through the creation of healing environments.
