

# NURS 7308 : Financial Management in Health Care

This course provides the student with a comprehensive review of financial concepts and principles applied to the financial decisions of health care agencies including capital budgeting, capital structure, and budgeting for personnel. Concepts informing financial management in health care include financial performance evaluation, asset valuation, capital budgeting, and both short-term and long-term financial planning, budgeting and forecasting. Students will study the development and interpretation of accounting information as a managerial tool for decision-making. Students will have the opportunity to apply their learning to financial management issues confronting those who lead care programs for their self-selected populations. In addition, the course emphasizes the importance of ethical responsibility in the conduct of business financial operations in health care.
