

NURS 7310 : Transforming Ethics, Law, and Policy Toward Healing Environments

This course is grounded in and shaped by the relationship between the IOM Future of Nursing report of 2010 and the distinctive mission and vision of the School of Nursing and the unique characteristics of the UST DNP program. An evidence-based analysis of extant policy patterns, both nationally and locally, will serve as a backdrop to the students' exploration of policies shaped by the goal of creating healing environments. Grounded in the Catholic intellectual tradition and Catholic social teaching, students will have the opportunity to investigate a policy issue specific to their self-selected populations and field test a policy role they can assume to address this issue, including germane financing, regulatory, ethical and delivery issues. Students will take the initiative with diverse stakeholders to advocate for the policy and nursing's role in reframing extant health policies. These diverse policy activities will be linked to the students' role as a transformational nurse leader.
